Mrs. Edwards: The performance of this group has been outstanding. Yesterday was their last day and they completed a five day job in four days and this all because of the excellent job they were doing in which the cleaning became an easier task as the weeks past by. 100% cleaning of each wall was completed.

The performance of the Panablasting workers during the period from December 19, 1998 and January 28, 1999 has been without doubt, outstanding. 100 % cleaning of the walls (Tow Track section) were completed each and every week in a safe and expeditious manner. During this period they've been able to improve on their cleaning efforts which have given them capability of going over areas they considered needed a second cleaning without creating a delay in the completion of their goal (clean 100% of each wall). No complaints were received from any locks worker or supervisor related to the job performed by this group of workers.
